## REMARKS

The figures of births and deaths shown in this statement for week ending the 19th June, 1956, relate to 219 towns with an estimated population of 32,747 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 69% of the total number of towns representing 79% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 17,115 and 7,901 representing birth and death rates of 27.2 and 12.5 per thousand of population respectively.

(a) *States (Parts A and C).*—The data here relate to 181 towns with an estimated population of 28,184 thousands. Information about Andhra and Punjab, could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 77% of the total number of towns representing 84% of the total population is covered. The number of births and deaths recorded in these towns were 14,961 and 6,920 representing birth rates

and death rates of 27.6 and 12.8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 38 towns with an estimated population of 4,563 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 58% of the total number of towns representing 56% of the total population is covered. The number of births and deaths recorded in these towns were 2,154 and 981 representing birth and death rates of 24.5 and 11.2 per thousand of population respectively.

Ganga nagar was the only town in Rajasthan which recorded a high death rate of 75.2 per thousand of population and this high death rate was mainly due to deaths from smallpox and dysentery and diarrhoea.
